

**Today was a big day for me –
my first time flying in a plane**

**At the airport, there were so
many people and so much
noise. It felt a bit overwhelming**

We checked in our bags and then went through security. I stayed close to Mom and Dad

In the waiting area, I watched planes take off and land. It was exciting but also a bit scary

■

When it was time to board, my heart started beating faster. I was both nervous and thrilled

■

Our seats were near the wings. I could see the huge engines and the flaps on the wings

The plane started moving, and soon we were speeding down the runway

I felt my stomach do a little flip as the plane lifted into the air. We were flying!

During the flight, I drew pictures of the plane and clouds

I even got to meet the pilot during the flight, which was really cool!

Landing was bumpy but exciting. I clapped with everyone when the plane touched down

I learned that flying is an adventure and something not to be afraid of. I can't wait to fly again!
